

#### phase 2 updates:

1. change the REPAIRS FOR relation between Customer and Repair\_details from dependent relation(double line diamond) to normal relation(single line diamond)
2. delete vehicle\_type attribute in vehicles
3. remove the dotted underline under attribute Transaction\_date
4. delete the UPDATE, COMPLETE relation between Service Writer and REPAIR\_DETAILS, since info about UPDATE and COMPLETE is not cared about by the user of the DB
5. change the relation between different roles and user from d to o
6. change the address from multi value attribute to composited attribute
7. change the relation between individual&Business and Customer from d to u
8. change the color from multivalued attribute to entity
